WELCOME TO BARCELONA

It is our great pleasure to invite you to the 3rd edition of the World Hospital at Home Congress (WHAHC 2023), taking place on 30 March - 1 April in beautiful Barcelona, Spain.

The World Hospital at Home Congress is the only international platform to advance the hospital at home model and ecosystem beyond borders and drive a new era of patient-centric care. In today's environment, hospital at home is not just an opportunity to improve the delivery of health care, it is our responsibility. Providing high-quality, cost-effective, and safe care for patients, hospital at home is the way of the future.

This year's program will focus on more than 10 important topics such as lessons learned post COVID-19, social aspects, technology solutions, ethical issues, quality and safety, policy, regulation and financial aspects.

Whether you are a clinician, healthcare practitioner, scientist, policy maker, part of a startup, or an established industry company, WHAHC 2023 is the congress for you. Submit your abstract today and help us build an ongoing conversation and multidisciplinary collaboration in hospital at home applications!

**Abstract submission deadline:
20 September 2022**

Leadership

Itamar Offer
Founder & Co-Chair of WHAHC

Bruce Allen Leff
Co-Chair of WHAHC

Michael Montalto
